Vol. 23 No. 1 January 2001

RESEARCH REPORTS

Structuring the composition process in scientific writing
Eira Wyn Patterson 1

Using Simulations in the Middle School: Does Assertiveness of Dyad Partners Influence Conceptual Change?
Mark Windschitl 17

Understanding the science of environmental issues: development of a subject knowledge guide for primary teacher education
Mike Summers, Colin Kruger, Ann Childs and Jenny Mant 33

Synthesizing research on student conceptions in science
Xiufeng Liu 55

The PLUS factors of family science
Mike Watts 83

Practical work at the upper high school level: the evaluation of a new model of assessment
Judith Bennett and Declan Kennedy 97

Vol. 23 No. 2 February 2001

RESEARCH REPORTS

Explorations in promoting conceptual change in electrical concepts via ontological category shift
Yeung Lee and Nancy Law 111

Students' talk about rotational motion within and across contexts, and implications for future learning
Wolff-Michael Roth, Keith B. Lucas and Campbell J. McRobbie 151

Contested terrain or unified project? 'The nature of science' in the National Curriculum for England and Wales
James Donnelly 181

Science and poetry: passion v. prescription in school science?
Mike Watts 197

Quality criteria and exemplary papers in chemistry education research
Holger Eybe and Hans-Jürgen Schmidt 209

Vol. 23 No. 3 March 2001

RESEARCH REPORTS

A longitudinal study of the influences of primary and secondary school, university and practicum on student teachers' images of effective primary science practice
Keith Skamp and Andrea Mueller 227

Assessing conceptual change of teachers involved in STES education and curriculum development – the STEMS project approach
Revital T. Tal, Yehudit J. Dori, Shoshana Keiny and Uri Zoller 247

Living with and learning about radioactivity: A comparative conceptual study
Steve Alsop 263

Actions and discourses for transformative understanding in a middle school science class
Stephen M. Ritchie and Kenneth Tobin 283

Science teachers' alternate conceptions about direct-currents
Harcharan Pardhan and Yasmeen Bano 301

Ideologies in school science textbooks
Erik Knain 319

Vol. 23 No. 4 April 2001

RESEARCH REPORTS

Student teachers' conceptions about effective primary science teaching: a longitudinal study
Keith Skamp and Andrea Mueller 331

Prospective teachers' ideas about the relationships between concepts describing the composition of matter
Rosa Martín del Pozo 353

Implementing an in-depth expanded science model in elementary schools: Multi-year findings, research issues, and policy implications
Nancy R. Romance and Michael R. Vitale 373

Integrated Learning Systems – an 'open' approach
Laurence Rogers and Leonard Newton 405

Configuration and dynamics of the Earth–Sun–Moon system: an investigation into conceptions of deaf and hearing pupils
Ingvild Roald and Øyvind Mikalsen 423

Vol. 23 No. 5 May 2001

RESEARCH REPORTS

Pupils' views of the role and value of the science curriculum: a focus-group study
Jonathan Osborne and Sue Collins 441

Investigating gender differences in the science performance of 16-year-old pupils in the UK
John F. Bell 469

Enrolment trends in school science education in Australia
John Dekkers and John de Laeter 487

High school students' use of meiosis when solving genetics problems
Cynthia F. Wynne, Jim Stewart and Cindy Passmore 501

Changing inquiry practices and beliefs: the impact of an inquiry-based professional development programme on beginning and experienced secondary science teachers
Julie A. Luft 517

Relationships among informal learning environments, teaching procedures and scientific reasoning ability
Brian L. Gerber, Anne M. L. Cavallo and Edmund A. Marek 535

Vol. 22 No. 6 June 2001

RESEARCH REPORTS

Conceptual classroom environment – a system view of learning
Miriam Reiner and Billie Eilam 551

Development of an informal learning opportunities assay
Brian L. Gerber, Edmund A. Marek and Ann M. L. Cavallo 569

Evaluating the language of different types of explanations in junior high school science texts
Len Unsworth 585

A four-level framework for identifying and classifying student conceptual and reasoning difficulties
Diane J. Grayson, Trevor R. Anderson and L. Gail Crossley 611

A rational reconstruction of the origin of the covalent bond and its implications for general chemistry textbooks
Mansoor Niaz 623

Instability in students' use of intuitive and Newtonian models to predict motion: the critical effect of the parameters involved
P. T. Mildenhall and J. S. Williams 643

Vol. 23 No. 7 July 2001

ANNOUNCEMENT

The Distinguished Contributions to Science Education Through Research Award 661

RESEARCH REPORTS

Characteristics of the methodology used to describe students' conceptions
N. Marín Martínez, I. Solano and E. Jiménez Gómez 663

Students' alternative conceptions and scientifically acceptable conceptions about gravity
David Palmer 691

A report of undergraduates' bonding misconceptions
Gayle Nicoll 707

Shifting sands: a case study of conceptual development as competition between alternative conceptions
Keith S. Taber 731

Promoting the development of a conceptual change model of science instruction in prospective secondary biology teachers
Din Yan Yip 755

Vol. 23 No. 8 August 2001

RESEARCH REPORTS

Examining student conceptions of the nature of science
David M. Moss, Eleanor D. Abrams and Judith Robb 771

Looking for ideas: observation, interpretation and hypothesis-making by 12-year-old pupils undertaking science investigations
Stephen P. Tomkins and Sue Dale Tunnicliffe 791

Dimensions of evidence, the public understanding of science and science education
Russell Tytler, Sandra Duggan and Richard Gott 815

The development and use of an instrument to assess students' attitude to the study of chemistry
Judith Bennett, Gail Green and Margie White 833

Developing attitude to science scales for use with children of ages from five to eleven years
Tony Pell and Tina Jarvis 847

A three-tier system for assessing concept map links: a methodological study
Gayle Nicoll, Joseph Francisco and Mary Nakhleh 863

Vol. 23 No. 9 September 2001

RESEARCH REPORTS

'To trust or not to trust, . . .'–pupils' ways of judging information encountered in a socio-scientific issue
Stein Dankert Kolstø 877

Role-play or debate to promote students' argumentation and justification on an issue in animal transgenesis
Laurence Simonneaux 903

Cohesion in science lesson discourse: clarity, relevance and sufficient information
Susan Rodrigues and Ian Thompson 929

Passive visitors or independent explorers: responses of pupils with severe learning difficulties at an Interactive Science Centre
Helen Brooke and Joan Solomon 941

Interactive learning in a higher education Level 1 mechanics module
Kathryn M. Booth and Brian W. James 955

Implementation of instructional innovations in K-8 science classes: perspectives of inservice teachers
Pradeep Maxwell Dass 969

Vol. 23 No. 10 October 2001

RESEARCH REPORTS

Three views of fairness in a school-based assessment scheme of practical work in biology
Benny Hin Wai Yung 985

Ideas about earthquakes after experiencing a natural disaster in Taiwan: An analysis of students' worldviews
Chin-Chung Tsai 1007

Gender differences in introductory undergraduate physics performance: university physics versus college physics in the USA
Robert H. Tai and Philip M. Sadler 1017

The two-tier instrument on photosynthesis: what does it diagnose?
Phyllis Baudoin Griffard and James H. Wandersee 1039

Impoving pre-laboratory preparation of first year university chemistry students
Marissa Rollnick, Stella Zwane, Mina Staskun, Sandra Lotz and Gail Green 1053

Weight versus gravitational force: historical and educational perspectives
Igal Galili 1073

Vol. 23 No. 11 November 2001

RESEARCH REPORTS

'That's what scientists have to do': preservice elementary teachers' conceptions of the nature of science during a moon investigation
Sandra Abell, Mariana Martini and Melissa George 1095

A cross-age study of junior high school students' conceptions of basic astronomy concepts
Ricardo Trumper 1111

The importance of images in astronomy education
B. Martínez Peña and M. J. Gil Quílez 1125

The development of first year physics students' ideas about measurement in terms of point and set paradigms
Andy Buffler, Saalih Allie, Fred Lubben and Bob Campbell 1137

Emphasizing concepts and reasoning skills in introductory college molecular cell biology
Barbara S. Chapman 1157

Describing the cognitive landscape in learning and teaching about forces
Dave Heywood and Joan Parker 1177

Vol. 23 No. 12 December 2001

RESEARCH REPORTS

Developing understanding through confronting varying views: the case of solving qualitative physics problems
Ping-Kee Tao 1201

Analysis of students' processes of confirmation and falsification of their prior ideas about electrostatics
Jongwon Park, Ikgyun Kim, Myunghwan Kim and Moo Lee 1219

Using demonstrations as a contextual road map: enhancing course continuity and promoting active engagement in introductory college physics
M. C. Buncick, P. G. Betts and D. D. Horgan 1237

If concept mapping is so helpful to learning biology, why aren't we all doing it?
Ian M. Kinchin 1257

The how's and why's of biological change: how learners neglect physical mechanisms in their search for meaning
Eleanor Abrams, Sherry Southerland and Catherine Cummins 1271

University physics students' use of models in explanations of phenomena involving interaction between metals and electromagnetic radiation
Andreas Redfors and Jim Ryder 1283

The impact of concept mapping and visualization on the learning of secondary school chemistry students
Ludo Brandt, Jan Elen, Jacqueline Hellemans, Luc Heerman, Ina Couwenberg, Liesbeth Volckaert and Heidi Morisse 1303
